SKILLS React, Redux, Rails, Javascript, Ruby, Python, PostgreSQL, Mongoose, MongoDB, Git, HTML5, CSS3

PROJECTS

PaperTrader (Rails, React, Redux, Javascript, Ruby, Jbuilder, PostgreSQL, HTML5, and CSS3)

[Live Site](#) | [Github](#)

A fullstack Investopedia Stock Simulator clone where users can place trades in the stock market using fake money to test their strategies

- Produced a fully functional website that searches stocks, saves account and trade information in a database, and allows users to edit their accounts.
- Applied years of experience as an equity and equity derivatives trader to confirm both professional traders and new traders will be satisfied with the end product
- Studied numerous APIs to ensure users will receive accurate stock information that best fit their needs
- Adopted idea of website from Investopedia and revamped sections to function more efficiently

STAI (Stock Technical Analysis Indicator) (Javascript, HTML, and CSS3)

[Live Site](#) | [Github](#)

A plain JavaScript website used to search a daily candle-stick chart for stocks with a customizable SMA (Simple Moving Average) overlay

- Integrated use of stock API calls in connection with 3rd party libraries to pull & display stock information
- Calculated SMA by using stock information in conjunction with user input in order to achieve user's desired output
- Customized layout of each webpage to enhance user experience

GreenMarket (React, Redux, Javascript, Mongoose, MongoDB, AWS, HTML5, and CSS3)

[Live Site](#) | [Github](#)

A fullstack original application where users can upload products or services they can exchange with their other users in their community

- Managed all code and requests to MongoDB as the Backend Lead in group of 4 programmers
- Established foundation of project for frontend associates to build their code
- Coordinated all routes and calls to database with Frontend Lead
- Assembled information in project's database to allow for ample testing and increase website's ease of use

EXPERIENCE

App Academy, Junior Instructor Assistant San Francisco, CA

2021 - present

- Taught students from across the country in perfecting the skills necessary to become a Software Engineer
- Assisted instructors with tasks including but not limited to grading tests, giving lectures, and guiding students through daily projects
